AIRSHIP

Made in Thailand exclusively for The Home Depot by Houseworks, Ltd.
2388 Pleasantdale Road, Atlanta, GA 30340 • 71154 • Thailand 1121

Contents:

Finished example.

ALSO NEEDED:

- Fine Sandpaper
- Wood Glue
- Hammer
- #2 Phillips Screwdriver

Assembly:

Start with sanding each wood piece to remove any rough edges. Remember to sand in the direction of the wood grain. Glue and nail the pieces together. Allow glue to completely dry.

1

Step 1—Check nail sizes **very carefully** and identify **2 short nails** and **4 medium nails**.

2

Step 2—Lay the **gondola** down with the nail holes facing up. The edge with the cutout is the front edge. Lay the **airship piece with the tab** down. Slide the tab into the cutout in the **gondola**. Make sure edges are even. Using **2 short nails**, nail them together.

3

Step 3—Lay both **engines** down with the nail holes facing up. Start **4 medium nails**.

4

Step 4—Glue one of the **engines** on the **gondola** with top and back edges even. Make sure the screw hole is on the **back edge**. Carefully, nail it in place. Turn the project over and repeat to attach the other **engine**.

5

Step 5—Add little glue to the cutout in the **other airship piece**. Fit the cutouts of the **airship pieces** and push in all the way.

6

Step 6—Using a #2 Phillips Screwdriver, add the **propellers** to the **engines** with **2 screws**. Don't screw too tightly and make sure **propellers** spin. Add the **stickers** as shown.
