FIRE CHIEF'S CAR

Made in Thailand exclusively for The Home Depot by Houseworks, Ltd.
2388 Pleasantdale Road, Atlanta, GA 30340 · 71149 · Thailand 0621

Contents:

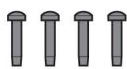

1 Top Car Piece

1 Bottom Car Piece

4 Wheels

4 Axle Pegs

Finished example.

1 Light Bar

1 Sticker Sheet

4 Long Nails

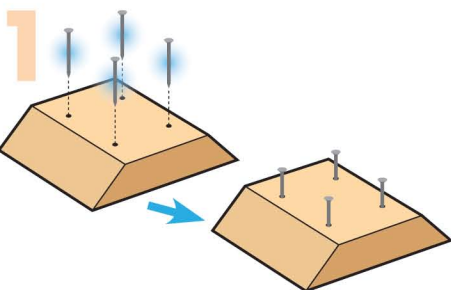

2 Short Nails

ALSO NEEDED:

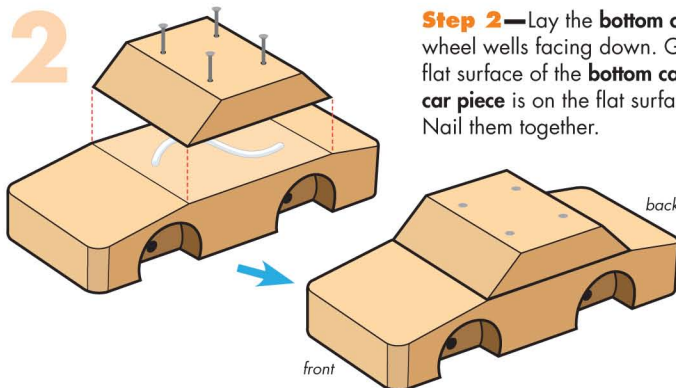

- Fine Sandpaper
- Wood Glue
- Hammer

Assembly:

Start with sanding each wood piece to remove any rough edges. Remember to sand in the direction of the wood grain. Glue and nail the pieces together. Allow glue to completely dry.

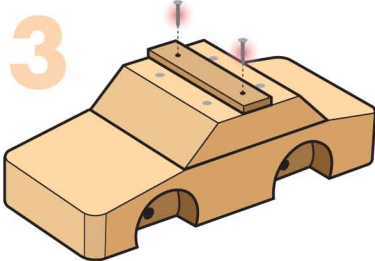

Step 1—Lay the top car piece down with the nail holes facing up. Start 4 long nails.

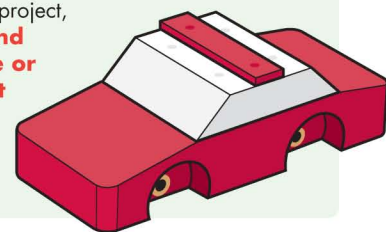

Step 2—Lay the bottom car piece down with the wheel wells facing down. Glue the top car piece on the flat surface of the bottom car piece. Make sure the top car piece is on the flat surface and side edges are even. Nail them together.

Note: Wider edge is the front (hood) and narrower edge is the back (trunk).

Step 3—Glue the light bar on top of the top car piece between the nails and centered. Make sure side edges are even. Nail it in place with 2 short nails.

Attention: If you are painting the project, **DO NOT** paint inside or around the peg holes. Painting inside or around the peg holes make it difficult to insert axle pegs. Allow the paint to dry completely.

Step 4—Slide an axle peg through each wheel. Put a dot of glue on the end of each axle peg and insert them into the peg holes. Tap with a hammer if necessary. Add the stickers as shown.
