## December 2024: Holiday Snow Globe

Ages 5-12

### CONNECT.

Imagine it's Sunday evening and a huge snowstorm is forecast overnight. More than a foot of snow is supposed to fall!

How do you feel before you go to bed? What are you wishing for?

### INVESTIGATE.

Snow days—and snow in general—can be magical. With a layer of snow, the world looks like a different place!

What are some of the adjectives (or descriptive words) that you would use to describe snow? What are some emotions that snow makes you feel? Record your words in the shape here and create a snowflake-shape poem!

### INNOVATE.

Then, use your poem as inspiration to embellish your Holiday Snow Globe and make it as magical and wintery as possible.

#### You'll need:

- Your Holiday Snow Globe
- LED lights
- Glitter
- Artificial snow
- Clear craft glue and paintbrush
- Optional: Hot glue
- Paint markers

1. First, use your paint markers to decorate the outside of your Snow Globe with snowflakes. Remember: No two snowflakes are alike! Focus mostly on decorating the red frame... If you

decorate the clear plastic sheet too much, it will be hard to see the scene inside!

2. Then, decide where your Snow Globe could use some glitter. It could look extra festive with glitter along all of the edges! Or perhaps you'd like a little bit almost everywhere! Use the paintbrush to apply the glue in a thin layer and then sprinkle glitter on top.
3. Next, think about whether you'd like to add any snow to the outside of the globe so it looks like even more like a winter wonderland. Continue using the paintbrush to add glue and then sprinkle on the artificial snow.
4. Lastly, add your LED lights. Nothing says winter coziness like some holiday lights! Try to add them by simply wrapping them around the Snow Globe. If this doesn't work, secure them with the hot glue gun and the help of an adult.
5. Finally, step back and take a look at what you've created. It should remind you of the words you wrote in your Snowflake Poem!

Share a picture of your embellished Holiday Snow Globe using [#kidsworkshopexplore](#).

Look at the fun pieces of snow in your holiday globe! Did you know that **Plumbers** stay very busy in the winter months installing and repairing pipes that burst from the cold?
