

HEART STRING ART

Made in Thailand exclusively for The Home Depot by Houseworks, Ltd.
2388 Pleasantdale Road, Atlanta, GA 30340 • 71129 • Thailand 1019

Contents:

Finished example.

ALSO NEEDED:

- Fine Sandpaper
- Wood Glue
- Hammer
- #2 Phillips Screwdriver

Assembly:

Start with sanding each wood piece to remove any rough edges. Remember to sand in the direction of the wood grain. Glue and nail the pieces together. Allow glue to completely dry.

Step 2—A: Tie one end of the **string** to the **nail** at the bottom of the heart shape and **make sure to leave the end about 3 inches**. This is your **starting nail**. **B:** Start wrapping the **string** around the outer shape. **When you reach the top center nail, make sure to loop around the nail to keep the heart shape** and continue to wrap around until you reach back to the **starting nail**. **C:** Then wrap the **string** around the **nails** to fill the heart shape. **Remember to keep the string tight.** Wrap the **string** around randomly as much as you can. **D:** Once you are satisfied with your heart string art OR when the **string** is about to run out, go back to the **starting nail** and loop around. **Tightly tie the ends together twice.**

Step 3 — Stand the **top** and **bottom** pieces up. Glue one of the **side** pieces on top. Make sure outside edges are even. Nail them together with **2 short nails**. Turn it over and repeat to attach the other **side** piece.

Step 4 — Lay the project flat. Add thin lines of glue to the top edge of the **top** and **bottom** pieces. Place the **back** on top. **Make sure the nail holes are on the top and bottom pieces and all edges are even.** Using **4 short nails**, nail them together to form a **frame**.

Attention: If you are painting the project, **paint only the frame**. Allow the paint to dry completely before attaching the **base**.
