CRANE

Made in Thailand exclusively for The Home Depot by Houseworks, Ltd.
2388 Pleasantdale Road, Atlanta, GA 30340 • 71136 • Thailand 0520

Contents:

Front
1 Body
3 Base
1 Cab
1 Winch
1 Hook
1 Piece of String
1 Sticker Sheet

Back

Also Needed:

- Fine Sandpaper
- Wood Glue
- Hammer
- #2 Phillips Screwdriver

Assembly:

Start with sanding each wood piece to remove any rough edges. Remember to sand in the direction of the wood grain. Glue and nail the pieces together. Allow glue to completely dry.

Step 1 — Lay the base down. Start 4 nails.

Step 2 — Lay the body down. Place the base on top. Make sure edges are even. Nail them together. Turn it over.

Step 3 — Lay the cab down with the nail holes on top. Start 2 nails. Place the cab on top of the front edge of the body. Make sure the screw hole is not covered. Make sure front and side edges are even. Nail them together.

Attention: If you are painting the project, DO NOT paint inside or around the peg holes. Painting inside or around the peg holes makes it difficult to insert axle pegs. Also, DO NOT paint the joint area of the winch and arm to make sure the arm moves. Allow the paint to dry completely.

Step 4 — Place the winch on top of the body with the screw holes matching. Using a #2 Phillips Screwdriver, attach them together with the long screw. Slide the wider end of the arm into the cutout in the winch and align the holes. Attach them together with the short screw. Adjust the short screw so that the arm is not too loose or tight.

Step 5 — Slide an axle peg through each wheel. Put a dot of glue on the end of each axle peg and insert them into peg holes. Tap with a hammer if necessary.

Step 6 — Add the stickers as shown. Push one end of the string into the hole in the arm and tie a knot. Push the other end of the string into the hole in the hook and tie a knot.
