RECYCLING TRUCK

Made in Thailand exclusively for The Home Depot by Houseworks, Ltd.
2388 Pleasantdale Road, Atlanta, GA 30340 • 71131 • Thailand 1219

Contents:

1 Base

2 Ends

2 Sides

4 Axle Pegs

4 Wheels

1 Hood

1 Bottom

1 Cab

1 Sticker Sheet

4 Long Nails

12 Short Nails

2 Screws

Finished example.

ALSO NEEDED:

- Fine Sandpaper
- Wood Glue
- Hammer
- #2 Phillips Screwdriver

Assembly:

Start with sanding each wood piece to remove any rough edges. Remember to sand in the direction of the wood grain. Glue and nail the pieces together. Allow glue to completely dry.

1

Step 1—Lay the hood and cab down with the nail holes on top. Start 4 long nails.

2

Step 2—Lay the base down with the screw holes on top and axle holes close to the bottom.

3

Step 3—Glue the hood over the front edge of the base (DO NOT cover the screw holes). Make sure the hood is centered on the base and front edges are even. Nail them together.
Glue the cab on the hood with side and back edges even. Nail them together.

4

Step 4—Stand the 2 end pieces up on the short edges. Glue one of the side pieces on top. Make sure all edges are even. Nail them together with 4 short nails. Turn it over and repeat to attach the other side piece.
Turn it down with the opening on top. Add thin lines of glue to the top edge of the end pieces. Place the bottom piece on top. Make sure all edges are even. Nail them together with 4 short nails to form a box.

5

Step 5—Glue the box over the base. Align with the screw holes. Using a #2 Phillips Screwdriver, attach them together with 2 screws.

6

Step 6—Slide an axle peg through each wheel. Put a dot of glue on the end of each axle peg and insert them into axle holes. Tap with a hammer if necessary. Apply the stickers as shown above.

Attention: If you are painting the project, DO NOT paint inside or around the peg holes. Painting inside or around the peg holes make it difficult to insert pegs. Allow the paint to dry completely.
